

HARSHINI B

Full Stack Developer

+91-9345282089 | bharshini2004@gmail.com | linkedin.com/in/harshini5204

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ years of experience building and shipping production-grade web applications using React.js, TypeScript, Node.js, and PostgreSQL. Experienced in designing scalable frontend architectures, building REST APIs, implementing multi-tenant systems, and delivering end-to-end features from design to production. Strong background in modern React ecosystems, database design, cloud integrations, and cross-functional collaboration. Recognized with a Spot Award for delivering high-impact production features and platform improvements.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Zustand, React Query, React Hook Form, Zod, Radix UI, shadcn/ui

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, Prisma ORM

Cloud & Tools: AWS S3, Git, GitHub, Postman, Figma, VS Code

Concepts: Multi-Tenancy, RBAC, Authentication & Authorization, API Design, Database Design, Rate Limiting, System Design

PROFESSIONAL EXPERIENCE

Associate Software Development Engineer | **QuarkSek Technologies** | May 2025 - Present

- Built and shipped production-ready React.js and TypeScript applications, translating Figma designs into scalable, reusable UI systems using Tailwind CSS, Zustand, React Query, React Hook Form, and Zod.
- Delivered end-to-end product features spanning database schema design, REST API development, frontend implementation, and AWS S3 integration.
- Designed and implemented a multi-tenant architecture enabling secure tenant isolation and scalable onboarding for enterprise customers.
- Developed backend APIs for Cloud Security Assessment and Multi-Tenancy modules, improving platform capabilities and reducing onboarding complexity.
- Implemented application-wide rate limiting and security controls for production launch, earning a Spot Award for high-impact contributions.
- Designed database schemas and integration APIs for JIRA synchronization, successfully delivering a working proof-of-concept ahead of schedule.
- Produced technical documentation, API specifications, and onboarding guides that accelerated knowledge transfer for new engineers.
- Led UI redesign initiatives across multiple user roles, improving design consistency and user experience throughout the platform.
- Mentored junior engineers through code reviews, architecture discussions, and API design sessions.

Software Development Engineer Intern | **QuarkSek Technologies** | April 2024 - April 2025

- Built reusable React.js and TypeScript UI components contributing to 2+ internal product features shipped to production.
- Developed Express.js backend services and integrated REST APIs with PostgreSQL via Prisma ORM, improving data reliability.
- Participated in Agile sprint planning and peer code reviews, consistently meeting sprint delivery targets.

PROJECTS

Automated Penetration Testing Web App - Next.js, TypeScript, Node.js, OWASP ZAP, Nmap

- Built a full-stack web application automating vulnerability scanning via OWASP ZAP and Nmap, reducing manual security audit effort significantly.
- Engineered backend services to orchestrate scan requests and auto-generate detailed vulnerability reports for risk mitigation.
- Developed a responsive Next.js dashboard with role-based views enabling users to trigger scans and review findings.

E-Buddy E-Commerce Platform - Next.js, Node.js, Express.js, MongoDB, Tailwind CSS

- Architected a full-stack e-commerce platform featuring vendor dashboards with product management, order tracking, and sales analytics.
- Built RESTful APIs for product, order, and user management following clean architecture principles for scalability.
- Designed a fully responsive UI with Tailwind CSS, delivering a consistent cross-device experience.

EDUCATION

B.Tech in Artificial Intelligence & Data Science (Honours) | *Kamaraj College of Engineering and Technology* | 2021 - 2025
